If you know, fine. If you do not know, fine too.

It appears EPA is giving Todd Hennis and San Juan Corp. a free ride. This is not a passive property owner, or someone who inherited the property. Hennis is an active mining player – buying and selling property, etc.

There are 14 mining claims that San Juan Corp. owns in San Juan County. I am attaching the

current property tax notice; while it is not a large amount, it is for a speculative property on the side of a mountain.

Why?
